In a nation on the brink of war, a young student's star-crossed love begins to bloom in the first book of the New York Times bestselling epic fantasy trilogy by award-winning author Laini Taylor. Around the world, black handprints are appearing on doorways, scorched there by winged strangers who have crept through a slit in the sky. In a dark and dusty shop, a devil's supply of human teeth have grown dangerously low. And in the tangled lanes of Prague, a young art student is about to be caught up in a brutal otherworldly war. Meet Karou. She fills her sketchbooks with monsters that may or may not be real; she's prone to disappearing on mysterious "errands"; she speaks many languages -- not all of them human; and her bright blue hair actually grows out of her head that color. Who is she? That is the question that haunts her, and she's about to find out. When one of the strangers -- beautiful, haunted Akiva -- fixes his fire-colored eyes on her in an alley in Marrakesh, the result is blood and starlight, secrets unveiled, and a star-crossed love whose roots drink deep of a violent past. But will Karou live to regret learning the truth about herself? This study presents policy options for improving the effectiveness of primary schools in developing countries. It examines problems common to most developing countries and presents an array of low-cost policy alternatives that have proved useful in a variety of settings. "The Bektashi Way is profoundly simple yet perplexingly complex, striking in its boldness yet gracious in its subtlety; consequently, while shining forth brightly it still is seemingly cloaked in obscurity. There have been attempts to gather its history, characteristic ideas,

and observable aspects together and to elucidate its inner wisdom in prose, but few of these attempts have been made by knowledgeable insiders, and even fewer of these have been made in English. This full translation of Baba Rexheb's Islamic Mysticism and the Bektashi Path from its original Albanian is thus a unique addition to the literature on Bektashism in English, and a boon to those who seek to know more about this clearly enigmatic way." --- Vafi Baba The development of micro, small, and medium-sized enterprises (MSMEs) remains key to promoting inclusive growth in developing economies in Asia and the Pacific. Causality, argues, Object Oriented Ontology (OOO), is aesthetic. In this book, Timothy Morton explores what it means to say that a thing has come into being, that it is persisting, and that it has ended. Drawing from examples in physics, biology, ecology, art, literature and music, Morton demonstrates the counterintuitive yet elegant explanatory power of OOO for thinking causality. This open access book presents up-to-date analyses of community-based approaches to sustainable resource management of SEPLS (socio-ecological production landscapes and seascapes) in areas where a harmonious relationship between the natural environment and the people who inhabit it is essential to ensure community and environmental well-being as well as to build resilience in the ecosystems that support this well-being. Understanding SEPLS and the forces of change that can weaken their resilience requires the integration of knowledge across a wide range of academic disciplines as well as from indigenous knowledge and experience. Moreover, given the wide variation in the socio-ecological makeup of SEPLS around the globe, as well as in their political and economic contexts, individual communities will be at the forefront of developing the measures appropriate for their unique circumstances. This in turn requires robust communication systems and broad participatory approaches. Sustainability science (SuS) research is highly integrated, participatory and solutions driven, and as such is well suited to the study of SEPLS. Through case studies, literature reviews and SuS analyses, the book explores various approaches to stakeholder participation, policy development and appropriate action for the future of SEPLS. It provides communities, researchers and decision-makers at various levels with new tools and strategies for exploring scenarios and creating future visions for sustainable societies. La incertidumbre reina cuando se negocia o se concierta un contrato, por lo que todos los contratos son natural o fisiológicamente incompletos. No contemplan "todos los estados del mundo". Bajo esta premisa, la doctrina económica ha venido subrayando los déficits de eficiencia que genera esta ausencia de completitud y ha evaluado la viabilidad de modelos contractuales abiertos a una posible negociación o renegociación ex post para adaptar la programación negocial a un mundo cambiante. Desde el punto de vista jurídico, estos acuerdos tan indefinidos o de términos tan abiertos suscitan un problema básico: decidir si estos convenios, pese a su indefinición, pueden o no ser elevados a la categoría de compromisos jurídicamente vinculantes. La derivada, obviamente, cuando se aprecie que existe contrato, es determinar cómo colmar los vacíos negociales y si resulta conveniente hacerlo. La presente obra pretende ofrecer respuesta a todas estas cuestiones a partir de un análisis detallado de la práctica judicial y de las distintas propuestas modernizadoras del Derecho de Contratos evidenciando que la clásica teoría del objeto del contrato todavía puede ofrecer algunas herramientas dogmáticas útiles a tal fin. This new volume in the Encyclopaedia of Sports Medicine series, published under the auspices of the International Olympic Committee, provides a state-of-the-art account of the epidemiology of injury across a broad spectrum of Olympic sports. The book uses the public health model in describing the scope of the injury problem, the associated risk factors, and in evaluating the current research on injury prevention strategies described in the literature. Epidemiology of Injury in Olympic Sports comprehensively covers what is known about the distribution and determinants of injury and injury rates in each sport. The editors and contributors have taken an evidence-based approach and adopted a uniform methodology to assess the data available. Each chapter is illustrated with tables which make it easy to examine injury factors between studies within a sport and between sports. With contributions from internationally renowned experts, this is an invaluable reference book for medical doctors, physical therapists and athletic trainers who serve athletes and sports teams, and for sports medicine scientists and healthcare professionals who are interested in the epidemiological study of injury in sports. This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fit' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice – the maqa' sid – which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.
