Keep your library on the cutting edge of technology with exciting and engaging e-textiles programming! The work of the Council of Europe for democracy is strongly

based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks is published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. Bookmarks is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges. Bookkeeping: An Integrated Approach is a VET accounting textbook, written directly to the Certificate IV in Bookkeeping qualification and also catering to the Certificate IV in Accounting and Certificate III in Accounts Administration. The text takes a step-by-step approach to computerised bookkeeping with MYOB software - an approach that is being enhanced in this fifth edition - which has been reorganised to incorporate the MYOB user guide, formerly published as a separate resource, into the textbook itself. New author, Mellida Frost, has replaced the now-retired Euan Sutherland for this revised edition. This volume provides a critical view of the nature and quality of political and civic communication on Twitter. The introduction lays out the current state of research, showing the continuum of views, from the more optimistic to more pessimistic, regarding the platform's potential to facilitate civic conversations. The eleven empirical case studies in the book provide new insights, addressing a variety of topics through a diverse array of methodological approaches. Together, the chapters provide a counter position to recent studies that offer more celebratory assessments of Twitter's potential. The book draws attention to the chaotic, insular, uncivil, and emotionally charged nature of debate and communication on Twitter. "This

comprehensive, six-volume collection addresses all aspects of online and distance learning, including information communication technologies applied to education, virtual classrooms, pedagogical systems, Web-based learning, library information systems, virtual universities, and more. It enables libraries to provide a foundational reference to meet the information needs of researchers, educators, practitioners, administrators, and other stakeholders in online and distance learning"--Provided by publisher.

Statistical data analysis is the backbone of sound business decision making, and finding the right tool to analyse a particular business problem is the key. By learning the fundamentals of statistical reasoning and data analysis, you will be on the way to becoming a better manager, analyst or economist. By providing a framework for solving statistical problems, this seventh Australian and New Zealand edition of Business Statistics teaches skills that you can use throughout your career. The book shows you how to analyse data effectively by focusing on the relationship between the kind of problem you face, the type of data involved and the appropriate statistical technique for solving the problem. Business Statistics emphasises applications over theory. It illustrates how vital statistical methods and tools are for today's managers and analysts, and how to apply them to business problems using real-world data. Using a proven three-step Identify-Compute-Interpret (ICI) approach to problem solving, the text teaches you how to: 1. IDENTIFY the correct statistical technique by focusing on the problem objective and data type; 2. COMPUTE the statistics doing them by hand and using Excel; and 3. INTERPRET results in the context of the problem. This unique approach enhances comprehension and practical skills. The text's vast assortment of data-driven examples, exercises and cases covers the various functional areas of business, demonstrating the statistical applications that marketing managers, financial analysts, accountants, economists and others use. Completely up-to-date, the seventh edition offers comprehensive coverage, current examples and an increased focus on applications in the real world.

The rapid evolution of technology continuously changes the way people interact, work, and learn. By examining these advances from a sociological perspective, researchers can further understand the impact of cyberspace on human behavior, interaction, and cognition. Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications is a vital reference source covering the impact of social networking platforms on a variety of relationships, including those between individuals, governments, citizens, businesses, and consumers. The publication also highlights the negative behavioral, physical, and mental effects of increased online usage and screen time such as mental health issues, internet addiction, and body image. Showcasing a range of topics including online dating, smartphone dependency, and cyberbullying, this multi-volume book is ideally designed for sociologists, psychologists, computer scientists, engineers, communication specialists, academicians, researchers, and graduate-level students seeking current research on media usage and its behavioral effects. Principles of Economics 7th edition combines microeconomics and macroeconomics into one volume for students who take a full year's course. The latest edition of this text continues to focus on important concepts and analyses necessary for students in an introductory economics course. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' such as climate change and resource taxation, the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, monetary and fiscal policy. Offers comprehensive coverage of the issues, concepts, trends, and technologies of distance learning. The brief and student-friendly approach of this book boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing

students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models, and policy changes and updates for the Principles of Macroeconomics text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. Principles of Macroeconomics, 7e encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving. ACCT3 Financial is the Asia-Pacific edition of the proven 4LTR press approach to financial accounting, designed to enhance students' learning experiences. The text is for teaching students learning the preparers/debits and credits approach and is presented in an easy-to-read and accessible style. Concise and complete new data and case studies from the Australian branch of CSL have been included as well as fully updated content. This new edition also includes a strong suite of student and instructor resources, including CourseMate Express, to enhance student learning and revision. The latest edition of this guide delivers what Apple doesn't—everything you need to know to successfully and painlessly move your files and adapt to Mac's way of doing things. Written with wit and objectivity by Missing Manual series creator and bestselling author David Pogue, this book will have you up and running on your new Mac in no time. "Windows ME" is the ideal user's guide for the world's most popular operating system. It walks readers through every conceivable kind of configuration, including setting up a small network. It even provides instructions for one of the hottest PC uses today: listening to live radio or watching live TV. Explains how to upgrade and repair processors, memory, connections, drives, multimedia cards, and peripherals. To meet your need for the effective board preparation this review book precisely mirrors the written Board exam. *Psychiatry Board Review* is the ideal self-study and pre-test manual for candidates for the written Part 1 of the Boards in Psychiatry. Its format creates the perfect high-yield source, consisting of four self-tests with 150 questions each, paralleling the format, subject matter, balance, and content of the*

Psychiatry written exams. Because your time is valuable, this book will help you focus your studies on material that has a high likelihood of appearing on the actual Boards. Allows for easy self study and exam preparation with an Individual test format. Simulates test conditions by allowing you to take self-timed tests. Provides a stand-alone source, eliminating the need for additional materials. Focuses on high-yield topics, such as neurology and visual material (patient photos, imaging, micrographs). Uses a multiple-choice question format that mirrors the examination style, to prepare you for the exact type of questions and conditions you'll experience when taking the test. Includes a CD-ROM to simulate computerized Boards. Provides comprehensive answer explanations. This book constitutes late breaking papers from the 22nd International Conference on Human-Computer Interaction, HCII 2020, which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark, but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as "Late Breaking Work" (papers and posters). These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The US Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS) are responsible for protecting species that are listed as endangered or threatened under the Endangered Species Act (ESA) and for protecting habitats that are critical for their survival. The US Environmental Protection Agency (EPA) is responsible for registering or reregistering pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and must ensure that pesticide use does not cause any unreasonable adverse effects on the environment, which is interpreted to include listed species and their critical habitats. The agencies have developed their own approaches to evaluating environmental risk, and their approaches differ because their legal mandates, responsibilities, institutional cultures, and expertise differ. Over the years, the agencies have tried to resolve their differences but have been

unsuccessful in reaching a consensus regarding their assessment approaches. As a result, FWS, NMFS, EPA, and the US Department of Agriculture asked the National Research Council (NRC) to examine scientific and technical issues related to determining risks posed to listed species by pesticides. Specifically, the NRC was asked to evaluate methods for identifying the best scientific data available; to evaluate approaches for developing modeling assumptions; to identify authoritative geospatial information that might be used in risk assessments; to review approaches for characterizing sublethal, indirect, and cumulative effects; to assess the scientific information available for estimating effects of mixtures and inert ingredients; and to consider the use of uncertainty factors to account for gaps in data. Assessing Risks to Endangered and Threatened Species from Pesticides, which was prepared by the NRC Committee on Ecological Risk Assessment under FIFRA and ESA, is the response to that request.
