Rothschild, Jennifer Rothschild Ministries "Whether you work in women's ministry, lay counseling, or professional counseling, you'll want to have this book on hand. It will become one of your most often-used resources."--Carol Kent, speaker and author of *Between a Rock and a Grace Place* Tim Clinton (EdD, The College of William and Mary) is president of the American Association of Christian Counselors (AACC), executive director of the Center for Counseling and Family Studies, professor of counseling and pastoral care at Liberty University and Liberty Baptist Theological Seminary, and a licensed professional counselor. Diane Langberg (PhD, Temple University) is a practicing psychologist whose clinical expertise includes thirty-five years of working with trauma survivors and clergy. She is the director of Diane Langberg, Ph.D. & Associates, a group practice in suburban Philadelphia, and an adjunct professor of practical theology at Westminster Theological Seminary. This is a shorter version of the classic bestseller *The Birth Partner*, ideal for time-pressed parents, partners, and birthing professionals. It is a convenient and easy-to-use book that provides facts on the fly during the ultra-busy period before, during, and after labor and birth. An added planner keeps your plans and to-dos in one place. Generations of spouses and partners, as well as doulas, nurses, midwives, and other professionals, have relied on Penny Simkin's warm and wise guidance in caring for the new mother, from the last trimester through the early postpartum period. Her book *The Birth Partner* is the definitive guide to helping a woman through labor and birth, and *The Birth Partner's Quick Reference Guide and Planner* is a more-concise version of that book. For those who have the original book, it adds a planner component, for hospital or at-home birth plans and for other essential to-dos. It is full of reliable and up-to-date information on: Preparing for labor and for the new baby Ways to help a woman through each stage of labor and birth Pain-relief measures, including epidurals and medications as well as natural techniques Ways to induce or speed up labor

Cesarean birth and complications that may require it Breastfeeding and newborn care and much more For the partner who wishes to be truly helpful in the birthing room, this is the essential book to have on hand. John Larmer describes the benefits of project based learning, outlines seven key project-based teaching practices, and offers tips for designing high-quality projects. Since the release of the first draft of the Next Generation Science Standards (NGSS), NSTA has been at the forefront in promoting the standards and helping science educators become familiar with and learning to navigate this exciting but complex document. Later, when the final version was released and states began adopting the standards, NSTA started to develop resources that would assist educators with their implementation. Along the way, NSTA learned that even the simplest of resources, like a one-page cheat sheet, can be extremely useful. Many of those tools are collected here, including: a two-page "cheat sheet" that describes the practices, core ideas, and crosscutting concepts that make up the three dimensions described in A Framework for K-12 Science Education; an "Inside the Box" graphic that spells out all of the individual sections of text that appear on a page of the NGSS; a Venn diagram comparing the practices in NGSS, Common Core State Standards, Mathematics, and Common Core State Standards, English Language Arts; and matrices showing how the NGSS are organized by topic and disciplinary core idea. This guide also provides the appropriate performance expectations; disciplinary core ideas; practices; crosscutting concepts; connections to engineering, technology, and applications of science; and connections to nature of science. The book's emphasis is on easy. Find the parts of the standards most relevant to you, acquaint yourself with the format, and find out what each of the different parts means. Indispensable to science teachers at all levels, as well as to administrators, curriculum developers, and teacher educators.
