Psychiatry Review and Canadian Certification Exam Preparation Guide Sep 07 2021 The first comprehensive psychiatry review textbook, designed expressly for the Canadian market, Psychiatry Review and Canadian Certification Exam Preparation Guide is the resource residents and psychiatrists need to master the qualifying examinations in psychiatry of the Royal College of Physicians and Surgeons of Canada. These exams are required for certification both for graduating residents and most foreign-trained psychiatrists seeking to practice in Canada. This new volume, based on The American Psychiatric Publishing Board Review Guide for Psychiatry, has been carefully edited to include only material relevant to the Canadian exam. References have been taken from both the U.S. and Canadian psychiatric literature, and laboratory units, medication names and doses, and the language used have been edited to be consistent with Canadian psychiatry. The volume takes the reader from the basic sciences comprising the foundation of psychiatry, through the psychiatric interview and other diagnostic topics, to syndrome-specific chapters paralleling DSM-IV-TR, and finally to current treatment options. Rounding out the review is a 200-question practice exam that reflects the structure of the actual board examinations. Although no substitute for quality medical and residency training, Psychiatry Review and Canadian Certification Exam Preparation Guide will help the prospective exam-taker ameliorate weaknesses and enhance strengths in preparation for a successful exam experience.

Evidence-Based Nursing Care Guidelines - E-Book Sep 26 2020 This groundbreaking reference — created by an internationally respected team of clinical and research experts — provides quick access to concise summaries of the body of nursing research for 192 common medical-surgical interventions. Each nursing care guideline classifies specific nursing activities as Effective, Possibly Effective, or Possibly Harmful, providing a bridge between research and clinical practice. Ideal for both nursing students and practicing nurses, this evidence-based reference is your key to confidently evaluating the latest research findings and effectively applying best practices in the clinical setting. Synthesizing the current state of research evidence, each nursing care guideline classifies specific activities as Effective, Possibly Effective, Not Effective, or Possibly Harmful. Easy-to-recognize icons for each cited study help you differentiate between findings that are based on nursing research (NR), multidisciplinary research (MR), or expert opinion (EO), or those activities that represent established standards of practice (SP). Each nursing activity is rated by level of evidence, allowing you to gauge the validity of the research and weigh additional evidence you may encounter. Guidelines are identified by NIC intervention labels wherever appropriate, and NOC outcome measurements are incorporated throughout. An Evolve website provides additional evidence-based nursing resources.
