Systematic Revision of Fossil Prairie Dogs With
Descriptions of Two New Species (Classic Reprint)
Nov 11 2019 Excerpt from Systematic Revision of
Fossil Prairie Dogs With Descriptions of Two New
Species For this revision, I examined over 400
fossil (pre Holocene) prairie dog Specimens and
Recent samples Of five extant species. My study
focussed on lower jaws with teeth because they
are abundant and diagnostic as fossils.

Relatively complete skulls, uncommon as fossils,
were considered when avail able. Isolated teeth
were only utilized when other, more complete
specimens were rare or absent at a locality. Post-
cranial elements were not studied. About the
Publisher Forgotten Books publishes hundreds of
thousands of rare and classic books. Find more at
www.forgottenbooks.com This book is a
reproduction of an important historical work.
Forgotten Books uses state-of-the-art technology
to digitally reconstruct the work, preserving the
original format whilst repairing imperfections
present in the aged copy. In rare cases, an

imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
