A significant number of Americans spend their weekends at UFO conventions hearing whispers of government cover-ups, at New Age gatherings learning the keys to enlightenment, or ambling around historical downtowns learning about resident ghosts in tourist-targeted “ghost walks”. They have been fed a steady diet of fictional shows with paranormal themes such as The X-Files, Supernatural, and Medium, shows that may seek to simply entertain, but also serve to disseminate paranormal beliefs. The public hunger for the paranormal seems insatiable. Paranormal America provides the definitive portrait of Americans who believe in or have experienced such phenomena as ghosts, Bigfoot, UFOs, psychic phenomena, astrology, and the power of mediums. However, unlike many books on the paranormal, this volume does not focus on proving or disproving the paranormal, but rather on understanding the people who believe and how those beliefs shape their lives. Drawing on the Baylor Religion Survey—a multi-year national random sample of American religious values, practices, and behaviors—as well as extensive fieldwork including joining hunts for Bigfoot and spending the night in a haunted house, authors Christopher Bader, F. Carson Mencken, and Joseph Baker shed light on what the various types of paranormal experiences, beliefs, and activities claimed by Americans are; whether holding an unconventional belief, such as believing in Bigfoot, means that one is unconventional in other attitudes and behaviors; who has such experiences and beliefs and how they differ from other Americans; and if we can expect major religions to emerge from the paranormal. Brimming with engaging personal stories and provocative findings, Paranormal America is an entertaining yet authoritative look at a growing segment of American religious culture.

Rainforest in the United States. The Old Growth Resistance (OGRE) wants to stop him from logging on his own land by suing to classify it as a protected wilderness area. OGRE's campaign, funded in part by marijuana cultivation, hits a roadblock when forest giants (bigfoot) are discovered living in the ancient old growth forest. Ultimately, the precarious balance between landed gentry and environmental extremists comes to rest on the shoulders of a twelve year-old girl-Graham's only child-who is befriended by a lone forest giant. The end result is both poignant and tragic. Kultus touches upon the universal nature of love, sentience, and the sustainability of resources in a world burdened with an ever-growing human population. Television personality, Cliff Barackman, calls this novel, "The riveting story of a metaphoric tug-of-war between lawyers, timber companies, land owners, hippies, and one young girl. Outside of these warring interests are the sasquatches whose ultimate fate depends on the outcome of the human wrangling." A surprising amount of research from the fields of anthropology and cryptozoology helps to enrich the story with realistic details. Like Upton Sinclair's, *The Jungle*, Kultus has the power to transform society for the better. Its social commentary about non-human intelligence is at once captivating, and also chilling.

"After nearly forty years of secrecy, the real truth is finally revealed behind the famous Roger Patterson "Bigfoot" film--a hoax that has managed to fool scores of scientists and millions of people around the world"--Cover. This special issue was designed to explore the role of health care professionals in the assessment, treatment, and prevention of child maltreatment. The initial five articles were solicited to enhance our understanding of various forms of child maltreatment as well as approaches designed to effectively respond to this difficult problem. The final manuscripts in this issue represent a theoretical and empirical perspective on child maltreatment. Medical settings represent a fertile arena for prevention as well as intervention initiatives. Future research should further support clinical strategies via program evaluation and outcome studies, and be aimed at enhancing our knowledge of the field and developing more comprehensive models to guide our efforts. It is hoped that this issue will stimulate research in this area and provide additional support for clinical interventions in the field. In "The Redneck Manifesto", Goad elucidates redneck politics, religion, and values in his own unique way. "A furious, profane, smart, and hilariously smart-aleck defense of working-class white culture".--"Fort Lauderdale Sun-Sentinel".

The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half-century. In nearly 2,000 pages and 4,000 signed entries, this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas, as a cradle of abolitionism and feminism, and as an apex of modern urban, suburban, and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world, but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi; New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate . . . and to the west. Entries by experts chronicle New York's varied areas, politics, and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads, weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps, and 140 tables, the Encyclopedia is key to understanding the state's past, present, and future. It is a crucial reference for students, teachers, historians, and business people, for New Yorkers of all persuasions, and for anyone interested in finding out more about New York State.
