Altered States Aug 21 2020 Building on Timothy Mitchell's seminal 1991 exploration of the "Limits of the State," this book brings together contributions on the state in the Arab world from the past and present in an edited volume. *Altered States* views the state less as a matter of people and institutions and more as sets of practices, regimes of truth, and capabilities of power, and the effects they have on those under their control. Through analysing case studies - including Tunisia, Syria, Lebanon, Egypt, Palestine, UAE, Rojova, and the Islamic State - the concept of the state is applied and questioned. This book examines the roots of policies that led to the uprisings, focusing on how the "authoritarian bargain", which helped define Arab politics, broke down with the rise of neoliberalism. It also assesses how boundaries between state and society have been redrawn, as various dynamics have brought state forces into more open conflict with citizens and each other. The rapid pace of change in the Arab world has necessitated constant modification of themes and theoretical lens of analysis. This book will, therefore, be of interest to practitioners, graduate students and academics of the Arab world, statehood, and political science.

Schaum's Outline of Fluid Mechanics Oct 03 2021 Study faster, learn better--and get top grades with Schaum's Outlines Millions of students trust Schaum's Outlines to help them succeed in the classroom and on exams. Schaum's is the key to faster learning and higher grades in every subject. Each Outline presents all the essential course information in an easy-to-follow, topic-by-topic format. You also get hundreds of examples, solved problems, and practice exercises to test your skills. Use Schaum's Outlines to: Brush up before tests Find answers fast Study quickly and more effectively Get the big picture without spending hours poring over lengthy textbooks Fully compatible with your classroom text, Schaum's highlights all the important facts you need to know. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great

Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

An Introduction to Virtual Sound Barriers

Nov 11 2019 A virtual sound barrier is an active noise control system that uses arrays of loudspeakers and microphones to create a useful size of quiet zone and can be used to reduce sound propagation, radiation, or transmission from noise sources or to reduce noise level around people in a noisy environment. This book introduces the history, principle, and design methods of virtual sound barriers first, and then describes recent progress in research on the systems. Two virtual sound barrier systems, i.e., planar virtual sound barrier system and three-dimensional virtual sound barrier system, are discussed including applications, limitations and future direction discussions.

Fluid Flow Measurement Nov 23 2020 There is a tendency to make flow measurement a highly theoretical and technical subject but what most influences quality measurement is the practical application of meters, metering principles, and metering equipment and the use of quality equipment that can continue to function through the years with proper maintenance have the most influence in obtaining quality measurement. This guide provides a review of basic laws and principles, an overview of physical characteristics and behavior of gases and liquids, and a look at the dynamics of flow. The authors examine applications of specific meters, readout and related devices, and proving systems. Practical guidelines for the meter in use, condition of the fluid, details of the entire metering system, installation and operation, and the timing and quality of maintenance are also included. This book is dedicated to condensing and sharing the authors' extensive experience in solving flow measurement problems with design engineers, operating personnel (from top supervisors to the newest testers), academically-based engineers, engineers of the manufacturers of flow meter equipment, worldwide practitioners, theorists,

and people just getting into the business. The authors' many years of experience are brought to bear in a thorough review of fluid flow measurement methods and applications Avoids theory and focuses on presentation of practical data for the novice and veteran engineer Useful for a wide range of engineers and technicians (as well as students) in a wide range of industries and applications

Why Nobody Believes the Numbers Jul 20 2020 Why Nobody Believes the Numbers introduces a unique viewpoint to population health outcomes measurement: Results/ROIs should be presented as they are, not as we wish they would be. This viewpoint contrasts sharply with vendor/promoter/consultant claims along two very important dimensions: (1) Why Nobody Believes presents outcomes/ROIs achievable right here on this very planet... (2) ...calculated using actual data rather than controlled substances. Indeed, nowhere in healthcare is it possible to find such sharply contrasting worldviews, methodologies, and grips on reality. Why Nobody Believes the Numbers includes 12 case studies of vendors, carriers, and consultants who were apparently playing hooky the day their teacher covered fifth-grade math, as told by an author whose argument style can be so persuasive that he was once able to convince a resort to sell him a timeshare. The book's lesson: no need to believe what your vendor tells you-- instead you can estimate your own savings using "ingredients you already have in your kitchen." Don't be intimidated just because you lack a PhD in biostatistics, or even a Masters, Bachelor's, high-school equivalency diploma or up-to-date inspection sticker. Why Nobody Believes the Numbers explains how to determine if the ROIs are real...and why they usually aren't. You'll learn how to: Figure out whether you are "moving the needle" or just crediting a program with changes that would have happened anyway Judge whether the ROIs your vendors report are plausible or even arithmetically possible Synthesize all these insights into RFPs and contracts that truly hold vendors accountable for results

The Last Resort Mar 28 2021 Thrilling,

heartbreaking, and, at times, absurdly funny, *The Last Resort* is a remarkable true story about one family in a country under siege and a testament to the love, perseverance, and resilience of the human spirit. Born and raised in Zimbabwe, Douglas Rogers is the son of white farmers living through that country's long and tense transition from postcolonial rule. He escaped the dull future mapped out for him by his parents for one of adventure and excitement in Europe and the United States. But when Zimbabwe's president Robert Mugabe launched his violent program to reclaim white-owned land and Rogers's parents were caught in the cross fire, everything changed. Lyn and Ros, the owners of Drifters—a famous game farm and backpacker lodge in the eastern mountains that was one of the most popular budget resorts in the country—found their home and resort under siege, their friends and neighbors expelled, and their lives in danger. But instead of leaving, as their son pleads with them to do, they haul out a shotgun and decide to stay. On returning to the country of his birth, Rogers finds his once orderly and progressive home transformed into something resembling a Marx Brothers romp crossed with *Heart of Darkness*: pot has supplanted maize in the fields; hookers have replaced college kids as guests; and soldiers, spies, and teenage diamond dealers guzzle beer at the bar. And yet, in spite of it all, Rogers's parents—with the help of friends, farmworkers, lodge guests, and residents—among them black political dissidents and white refugee farmers—continue to hold on. But can they survive to the end? In the midst of a nation stuck between its stubborn past and an impatient future, Rogers soon begins to see his parents in a new light: unbowed, with passions and purpose renewed, even heroic. And, in the process, he learns that the "big story" he had relentlessly pursued his entire adult life as a roving journalist and travel writer was actually happening in his own backyard. Evoking elements of *The Tender Bar* and *Absurdistan*, *The Last Resort* is an inspiring, coming-of-age tale about home, love, hope, responsibility, and redemption. An edgy, roller-coaster adventure, it is also a deeply moving story about how to survive a corrupt Third World dictatorship with a little innovation, humor, bribery, and brothel

management.

Love by Night Jun 30 2021 More of a story than a collection of poetry, *Love by Night* will whisk you away from your world and into the dreamy romantic night. *Love by Night* begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

Tourism Management Jun 18 2020 Electronic Inspection Copy available for instructors here This exciting new text offers all students of Tourism a concise introduction to all the core topics of Tourism Management. Covering both key theory and practice it introduces students to general management issues across the whole tourism sector in an accessible and manageable way. Focusing particularly on the challenges of managing tourism in the 21st Century, it integrates the themes of sustainability, internationalism, technology and globalisation throughout to provide a thoroughly modern approach to the study of Tourism. Key features of this text include: - A specific focus on the management of tourism in the context of economic, social and environmental conditions, avoiding lengthy descriptions of the various components of the sector; - Three main integrated themes focusing on the demand for tourism, the supply of tourism, and the challenge of balancing of the two; - Coverage of how management techniques are developing in response to changing patterns of demand, emerging markets and destinations, globalisation, and the impacts of tourism; - Discussion points, examples and cases studies

designed with the broadest cultural and international dimensions in mind for today's diverse student profile. Written specifically for those looking for core topic coverage in a manageable and concise format, this text will be essential reading for those looking for a truly contemporary introduction to Tourism Management.

The Collaborative Economy in Action:

European Perspectives Feb 19 2023 The book titled *The Collaborative Economy in Action: European Perspectives* is one of the important outcomes of the COST Action CA16121, *From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy* (short name: *Sharing and Caring*; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action *Sharing and Caring* is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action *Sharing and Caring* helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action *Sharing and Caring*. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time

of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukasiewicz, and Gabriela Avram (2018) that was published on the *Sharing and Caring* website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Piora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuiyte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the

intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

Cracking Health Costs Apr 28 2021 *Cracking Health Costs* reveals the best ways for companies and small businesses to fight back, right now, against rising health care costs. This book proposes multiple, practical steps that you can take to control costs and increase the effectiveness of the health benefit. The book is all about rolling back health care costs to save companies and employees money. Working hand-in-hand with their employees, businesses need to ensure that, whenever feasible, employees with the most expensive diagnoses get optimal treatment at hospitals not practicing "volume-driven" medicine for higher profits. Less than 10% of employees incur 80% of costs. About 20% of patients have been completely misdiagnosed, while many others are simply the victims of surgeons who are either practicing bad medicine or overtreating for profit. For example, some companies, such as Walmart and Lowe's, are turning to the "Centers of Excellence" approach author Tom Emerick helped to pioneer while running benefits for Walmart. By determining which hospitals are adopting the highest standards of care, benefits managers can reduce the number of unnecessary high-cost surgeries and improve employees' overall health. The solution-based approach offered by the book is unique, because it can be implemented by businesses today.

Record of the Rust Family Sep 14 2022 Henry Rust (d.ca. 1684/1685) emigrated from Hingham, Norfolk County, England to Hingham, Massachusetts in about 1634/1635, and moved to Boston, Massachusetts in 1645. Descendants and relatives lived in New England, New York, New Jersey, Michigan, Illinois, Kansas, Wisconsin and elsewhere. Includes some history of the Rust family in England and Germany to

1312, as well as other Rust individuals who immigrated to Pennsylvania from Germany and to Virginia and elsewhere in the south from England.

Italian Cruisers of World War II Nov 04 2021

The Italian Royal Navy (Regia Marina) operated one of the largest cruiser forces of World War II. As a signatory to the 1922 Washington Naval Treaty, the Regia Marina immediately attempted to reinforce its treaty-limited battleship force by building seven large 10,000-ton heavy cruisers. Italian light cruisers also possessed an interesting design history and were involved in every major fleet engagement in the Mediterranean, as well as several smaller encounters with units of the British Royal Navy. Fully illustrated with specially commissioned artwork, this fascinating volume examines the history of the Regia Marina's cruisers during World War II where they came up against the might of the British Royal Navy.

Energy Feb 13 2020 Why plant trees that only provide shade when they could yield fruit as well? Why not take advantage of sunny patches at the outskirts of parking lots to grow carrots and strawberries, free for the harvesting? The idea that public land could be used creatively to grow fresh food for local citizens was beginning to gain traction when *Public Produce* was first published in 2009, but there were few concrete examples of action. Today, things are different: fruits and vegetables are thriving in parks, plazas, along our streets, and around our civic buildings. This revised edition profiles numerous communities and community officials that are rethinking the role of public space in cities, and how our most revered urban gathering spots might nourish both body and soul. Taking readers from inspiration to implementation, *Public Produce* is chock full of tantalizing images and hearty lessons for bringing agriculture back into our cities.

Engine Management Oct 23 2020 Tuning engines can be a mysterious art, all engines need a precise balance of fuel, air, and timing in order to reach their true performance potential. *Engine Management: Advanced Tuning* takes engine-tuning techniques to the next level, explaining how the EFI system determines engine operation and how the calibrator can change the controlling parameters to optimize

actual engine performance. It is the most advanced book on the market, a must-have for tuners and calibrators and a valuable resource for anyone who wants to make horsepower with a fuel-injected, electronically controlled engine. Pat the Zoo (Pat the Bunny) Jan 26 2021 A fun and exciting touch-and-feel book featuring one of the best-selling children's book characters of all time - Pat the Bunny! Pat the Bunny has been creating special first-time moments between parents and their children for over 75 years. This engaging touch-and-feel book takes babies on a playful trip to the zoo where they can pet animals like lions, pandas, turtles, and more, all the while making cherished memories that will last a lifetime.

Spectra of Graphs Jun 11 2022 This book gives an elementary treatment of the basic material about graph spectra, both for ordinary, and Laplace and Seidel spectra. The text progresses systematically, by covering standard topics before presenting some new material on trees, strongly regular graphs, two-graphs, association schemes, p-ranks of configurations and similar topics. Exercises at the end of each chapter provide practice and vary from easy yet interesting applications of the treated theory, to little excursions into related topics. Tables, references at the end of the book, an author and subject index enrich the text. *Spectra of Graphs* is written for researchers, teachers and graduate students interested in graph spectra. The reader is assumed to be familiar with basic linear algebra and eigenvalues, although some more advanced topics in linear algebra, like the Perron-Frobenius theorem and eigenvalue interlacing are included.

John Bull's Other Homes May 10 2022 State housing became an integral part of the relationship between Ireland and Great Britain from the 1880s until the early 1990s. Using research from both Irish and Westminster sources, this book shows that there was

recurrent pressure for the state to intervene in housing in Ireland in a period when the "Irish Question" was the major domestic political issue. The result was that the model of subsidized state housing subsequently introduced in Britain was first developed in Ireland, as a product of the tensions of British rule. An important corollary of innovative Irish housing policy was its influence, even in a negative sense, on developments in mainland Britain. This book also examines the cultural impact of imperialism, and in particular the way in which British ideas of garden suburb housing and town planning design came significantly to reshape the Irish urban environment. Fraser not only presents hitherto unknown material, but does so in a unique interdisciplinary blend of architectural, planning, urban and socio-economic history. *Assembly Cookbook for the Apple II/IIIe* Oct 11 2019 Explains the advantages of assembly language, shows how to write assembly language programs, and includes sample subroutines

Internal Combustion Engines Jul 12 2022

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material

emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets
