The Boeing B-29 was one of the most sophisticated aircraft of WWII. It featured many innovations including guns that could be fired by remote control and pressurized crew compartments. It was also the heaviest production plane of the war, with terrific range and bomb-carrying capabilities. Carrying a crew of ten, the Superfortress devastated Japan in a series of raids in 1944-45. Finally, in August of 1945, the B-29s "Enola Gay" and "Bock's Car" dropped the atomic bombs and forced Japan to surrender. Originally printed by the U.S. Army Air Force, this B-29 Airplane Commander Pilot's Training Manual taught pilots everything they needed to know about the Superfortress. Classified 'Restricted', the text was declassified long ago and is here reprinted in book form. This impressive 8.5x11 facsimile presents the manual in its entirety. It features over 200 black and white pages of pilot and crew information, and puts you right in the cockpit of one of history's great planes! Instruktionsbog for det amerikanske jagerfly fra 2. verdenskrig, P-51 Mustang. The heavily armed P-61 Black Widow was the U.S. Army Air Force's first dedicated night fighter. Equipped with radar, four .50 caliber machine guns and four 20mm. cannons, the Widow was a fearsome adversary. It flew as both an intruder and interceptor in Europe and the Pacific. Originally printed by Northrop in 1945,

the YP-61 Pilot's Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Originally classified "Restricted," the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted, and color images appear as black and white. Care has been taken however to preserve the integrity of the text. Now available in paperback, this award-winning book provides a comprehensive history of gender policies and practices in American public schools. David Tyack and Elisabeth Hansot explore the many factors that have shaped coeducation since its origins. At the very time that Americans were creating separate spheres for adult men and women, they institutionalized an education system that brought boys and girls together. How did beliefs about the similarities and differences of boys and girls shape policy and practice in schools? To what degree did the treatment of boys and girls differ by class, race, region, and historical period? Debates over gender policies suggest that Americans have made public education the repository of their hopes and anxieties about relationships between the sexes. Thus, the history of coeducation serves as a window not only on constancy and change in gender practices in the schools but also on cultural conflicts about gender in the broader society. "Learning Together presents a rich and exhaustive search through [the] 'tangled history' of gender and education that links both the silences and the debates surrounding coeducation to the changing roles of women and men in our society....It is the generosity and capaciousness of Tyack and Hansot's scholarship that makes Learning Together so important a book." –Science

ought's A-7 Corsair II served the U.S. Navy for over over two decades, and flew with distinction during the Vietnam conflict. The subsonic A-7 was based on Chance Vought's supersonic F-8 Crusader. It boasted a heads-up display, an inertial navigation system, and other innovations. The plane entered service in 1966, and served in Vietnam in late 1967. Its performance was impressive. The USS Ranger's

VA-147 flew over 1,400 sorties with the loss of only one aircraft. The Air Force purchased an advanced version, the A-7D, equipped with a more powerful engine. The plane later flew missions over Lebanon, Libya, Grenada, Panama, and Iraq. The last planes in U.S. inventory were retired in 1991. Originally printed by the U.S. Navy and Vought, this handbook for the A-7 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified *restricted*, the manual was recently declassified and is here reprinted in book form. "With an appendix containing a full analysis of the debts of the United States, the several states, municipalities etc. Also statements of street railway and traction companies, industrial corporations, etc." (statement omitted on later vols.).
