Twelve-year-old Bryn has always dreamed of becoming a Seeker, just like her dad. Only the Seekers are allowed to journey from their small village into the fantastical, untamed wilderness of their island known as the Wild Realm. Once there, they obtain magical items for the village and use magic to protect and heal the incredible creatures native to the Realm. When one of the elderly Seekers retires, leaving a vacant position, Bryn knows this may be her chance. There's just one problem: Only boys have ever

been Seekers. And the training master makes it clear he will not be training a girl. But then Bryn's biggest rival for the Seeker position, a boy named Ari, shows up at her door. He reveals the baby dragon he's been hiding, and the two strike a deal—if Bryn helps care for the dragon, Ari will share all his training with her. Even as the two bond over their love of magical animals and their secret trips into the Wild Realm, Bryn doesn't completely trust Ari's motives. Especially as she suspects Ari may know more than he's letting on about the enemy clan stirring up unrest in their village. When all these secrets come to a head and the stakes are at their highest, Bryn realizes it's up to her to save her family...and the Realm. "Long before Harry Potter and J. K. Rowling, there were Gandalf, Bilbo Baggins, and J. R. R. Tolkien . . . This will bring the creator to vivid life" (Booklist). A philologist of world renown, a professor at Oxford, and the author of academic treatises, J.R.R. Tolkien was far more than a fantasy book writer. His lifelong fascination with medieval texts and languages gave him a unique vision and endless inspiration for his tales. His broad interests made possible his creation of faery worlds and entire races of beings, as well as the languages, cultures, and characters that make his books as engaging today as they were fifty years ago. This clear and thoroughly researched

biography of the creator of The Hobbit is accompanied by magical illustrations that recall the mystery of Tolkien's imaginary worlds. "Give[s] some interesting insight into the power Tolkien's work has had on people over the years." —School Library Journal Unlike many books on painting that usually talk about art or painters, James Elkins' compelling and original work focuses on alchemy, for like the alchemist, the painter seeks to transform and be transformed by the medium. In What Painting Is, James Elkins communicates the experience of painting beyond the traditional vocabulary of art history. Alchemy provides a magical language to explore what it is a painter really does in her or his studio - the smells, the mess, the struggle to control the uncontrollable, the special knowledge only painters hold of how colours will mix, and how they will look. Written from the perspective of a painter-turned-art historian, What Painting Is is like nothing you have ever read about art. Emily Windsnap lives on a boat, but her mother has always been oddly anxious to keep her out of the water. It is only when Emily has her first school swimming lesson that she discovers why: as soon as she gets into the water, she grows a tail! Soon Emily discovers a glorious underwater world of fishes, coral, shipwrecks and mermaids, and, best of all, she finds a best friend! With mermaid Shona Silkfin

by her side, Emily uncovers a surprising family secret and embarks on a quest to reunite her mum and dad. This enchanting fantasy deals with universal themes of family, friendship, love and justice - all handled with the lightness of touch for which Liz Kessler is so well known. Life is not easy for twelve-year-old Erec Rex. His single mother can barely support her six adopted kids. And they've moved into an apartment so tiny that Erec sleeps with the washing machine. Worse, there is a strange force within Erec that is making him do odd things. His urge to obey these thoughts grows -- until it becomes impossible to resist them. Then one morning, Erec's mother is missing. The force inside Erec commands him to find her, leading him on an adventure that will change him forever. When he arrives in Alypium, a hidden world where old knowledge of magic is kept, Erec learns that his mother and the entire kingdom are in peril. And he might be the only one who can save them. In his witty first novel for young readers, New York Times best-selling author Jasper Fforde introduces fifteen-year-old Jennifer Strange, who runs an agency for underemployed magicians in a world where magic is fading away. But when visions of the death of the world's last dragon begin, all signs point to Jennifer—and Big Magic. In Arcadia, winter has no heart. I make magic dresses for a living. I'm not rich or pretty enough

to wear them, but I love what I do, working out of my family's shop on Carnaby Street in London- until the fae show up. It's a straight-up kidnapping, and before I know it, I'm brought to this wintry place of cold hearts and beautiful nightmares, but that's not the worst part. The worst part is, they think I'm fae, and I'm supposed to participate in some competition against a host of other women who have been training their whole lives for this. The prize? The winner is to marry the Prince. On the surface that sounds almost like a fairytale, only this competition is brutal and bloody, and the Prince is the jerk that kidnapped me. I can't get too close to him or he'll know I'm not fae, and then I'm dead. But I want to get close to him. His body burns with the fire of a cold star, and I'm drawn to him. I need to fight the pull and survive long enough to find a way out of here, but these winter fae won't make that easy. A bullied little chicken discovers his inner strength along with some surprising dinosaur ancestry in this farmyard tale with huge heart. Little Chick just wants to belong, but the bullies of the barnyard—Little Donkey, Little Pig, and Little Sheep—won't let him play in their tree house because he is a chicken, and chickens are not strong and brave. Little Chick sees their point: What have chickens done besides invent the chicken dance and cross the road? But when his

father shows Little Chick the family photo album, he learns something HUGE: He is related to the gigantic and ferocious Tyrannosaurus rex! Armed with this new knowledge, Little Chick returns to the tree house just in time to rescue the bullies from a scary wolf—and prove that strength and bravery have nothing to do with size. Covers the evolution of the legend over time and analyses the major themes that have emerged. Alexander Thomas Kindle III (better known as Chubzy) is excited to start school and make new friends. But as Chubzy meets his new fifth-grade teacher, Mrs. Broomstickle, strange things start to happen. Mrs. Broomstickle gives the children their homework assignment which consists of one piece of dark chocolate and an alarm clock. At midnight, the alarm clocks ring. Half of the children follow the instructions; they eat the chocolate and go back to sleep. The other half are too sound asleep to hear the alarms going off. The chocolate transforms into evil dark creatures and slips into the mouths of the innocent children, transforming them into their worst nightmare. And someone outside the group mistakenly eats one of the tasty treats. Now the kids must work as a team and travel to the Land of No Beauty to locate the magic piper and the crystals, which are heavily guarded and hidden. Each obstacle the children encounter becomes harder and more deadly than the next.

Time is running out; they need to find the Magic Piper and the six crystals to lift the curse. Everyone's favorite time-travelers are changing their styles! The Time Warp Trio series now features a brand-new, eye-catching design, sure to appeal to longtime fans, and those new to Jon Scieszka's wacky brand of humor. A Critique of Anti-racism in Rhetoric and Composition: The Semblance of Empowerment critiques current antiracist ideology in rhetoric and composition, arguing that it inadvertently promotes a deficit-model of empowerment for both students and scholars. Erec Smith claims that empowerment theory—which promotes individual, communal, and strategic efficacy—is missing from most antiracist initiatives, which instead often abide by what Smith refers to as a "primacy of identity": an over-reliance on identity, particularly a victimized identity, to establish ethos. Scholars of rhetoric, composition, communication, and critical race theory will find this book particularly useful. When twelve-year-old Erec Rex learns that his friend Bethany is in trouble in Aypium, the magical kingdom he is destined to rule, he rushes to try to save her and to find the five Awen in order to protect the Substance. Trouble is brewing in quiet, pleasant Aypium, and only Erec Rex can make it better. All of the baby dragons have mysteriously disappeared, and King Piter has lost the trust of

his people. Worse, the evil Stain brothers will become the new rulers of the Kingdom of the Keepers unless Erec returns to Alympium and challenges them. but if Erec becomes king, the power of the royal scepter could destroy him completely. As Erec performs deadly quests in pursuit of the throne, he discovers that the right path brings many risks and few rewards -- and when he must delve into the Substance that holds our world together, he must summon all of his strength just to survive. "A ... memoir-in-essays that tackles the big questions of life, death, and existential fear with humor and hope"-- A world-renowned paleontologist reveals groundbreaking science that trumps science fiction: how to grow a living dinosaur. Over a decade after Jurassic Park, Jack Horner and his colleagues in molecular biology labs are in the process of building the technology to create a real dinosaur. Based on new research in evolutionary developmental biology on how a few select cells grow to create arms, legs, eyes, and brains that function together, Jack Horner takes the science a step further in a plan to "reverse evolution" and reveals the awesome, even frightening, power being acquired to recreate the prehistoric past. The key is the dinosaur's genetic code that lives on in modern birds- even chickens. From cutting-edge biology labs to field digs underneath the Montana sun, How to Build a Dinosaur explains

and enlightens an awesome new science. Spanning a millennium of musical history, this monumental volume brings together nearly forty leading authorities to survey the music of Western Europe in the Middle Ages. All of the major aspects of medieval music are considered, making use of the latest research and thinking to discuss everything from the earliest genres of chant, through the music of the liturgy, to the riches of the vernacular song of the trouvères and troubadours. Alongside this account of the core repertory of monophony, The Cambridge History of Medieval Music tells the story of the birth of polyphonic music, and studies the genres of organum, conductus, motet and polyphonic song. Key composers of the period are introduced, such as Leoninus, Perotinus, Adam de la Halle, Philippe de Vitry and Guillaume de Machaut, and other chapters examine topics ranging from musical theory and performance to institutions, culture and collections. Beards and Texts explores the literary portrayal of beards in medieval German texts from the mid-twelfth to the early sixteenth centuries. It argues that as the pre-eminent symbol for masculinity the beard played a distinctive role throughout the Middle Ages in literary discussions of such major themes as majesty and humanity. At the same time beards served as an important point of reference in

didactic poetry concerned with wisdom, teaching and learning, and in comedic texts that were designed to make their audiences laugh, not least by submitting various figure-types to the indignity of having their beards manhandled. Four main chapters each offer a reading of a work or poetic tradition of particular significance (Pfaffe Konrad's Rolandslied; Wolfram von Eschenbach's Willehalm; 'Sangspruchdichtung'; Heinrich Wittenwiler's Ring), before examining cognate material of various kinds, including sources or later versions of the same story, manuscript variants and miniatures and further relevant beard-motifs from the same period. The book concludes by reviewing the portrayal of Jesus in vernacular German literature, which represents a special test-case in the literary history of beards. As the first study of its kind in medieval German studies, this investigation submits beard-motifs to sustained and detailed analysis in order to shed light both on medieval poetic techniques and the normative construction of masculinity in a wide range of literary genres. In an alternate United Kingdom, King Snodd aims to control the world by controlling magic, and only 16-year-old Jennifer Strange, acting manager of an employment agency for sorcerers, stands between Snodd and his plans, in the sequel to The Last Dragonslayer. 75,000 first printing. With a

romance brewing between him and Bethany, the discovery that his brother and sister are secretly king and queen of the Fairy world, plus the Stain brothers growing more and more underhanded, fourteen-year-old Erec is not in the right state of mind for his next two tasks. When twelve-year-old Erec Rex learns that his friend Bethany is in trouble in Aлыпium, the magical kingdom he is destined to rule, he rushes to try to save her and to find the five Awen in order to protect the Substance. On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture.

Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing. This new book examines all of the available source materials,

dating from the ninth century to the present, that have associated Arthur with sites in Wales. The material ranges from Medieval Latin chronicles, French romances and Welsh poetry through to the earliest printed works, antiquarian notebooks, periodicals, academic publications and finally books, written by both amateur and professional historians alike, in the modern period that have made various claims about the identity of Arthur and his kingdom. All of these sources are here placed in context, with the issues of dating and authorship discussed, and their impact and influence assessed. This book also contains a gazetteer of all the sites mentioned, including those yet to be identified, and traces their Arthurian associations back to their original source. : When the 5,000-year-old djinni Bartimaeus is summoned by Nathaniel, a young magician's apprentice, he expects to have to do nothing more taxing than a little levitation or a few simple illusions.
